Condensate Protection

CONDENSATE PARTICULATE REMOVAL RO PREFILTER

- UP TO 1500 GPM PER HOUSING
- EASY CHANGEOUT
- CRUD Capture
- Most Inexpensive way to obtain some particulate protection and means of removal

Graver Technologies' AEGIS TurboGuard

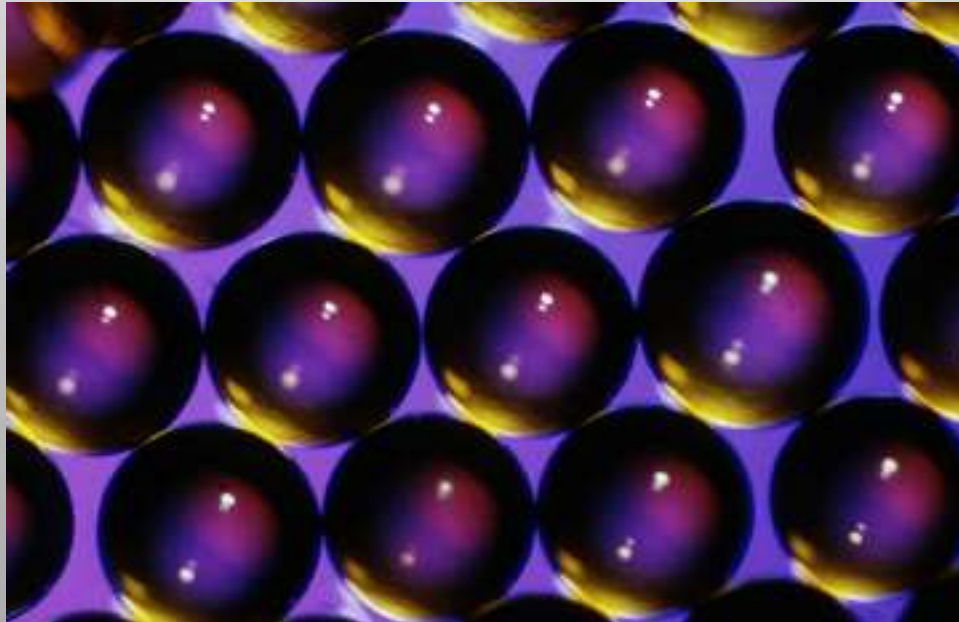

“

Graver Technologies' - AEGIS TurboGuard

- 60" element designed to fit all original manufacturers' equipment.
- Integral end cap with molded handle and full polypropylene wrap to provide easy removal without media tearing and escape of filtered dirt
- Glass filled ABS caps capable of withstanding Condensate operating temperatures
- Solvent welded center joint caps designed to be self-aligning to guarantee cylindrical conformation

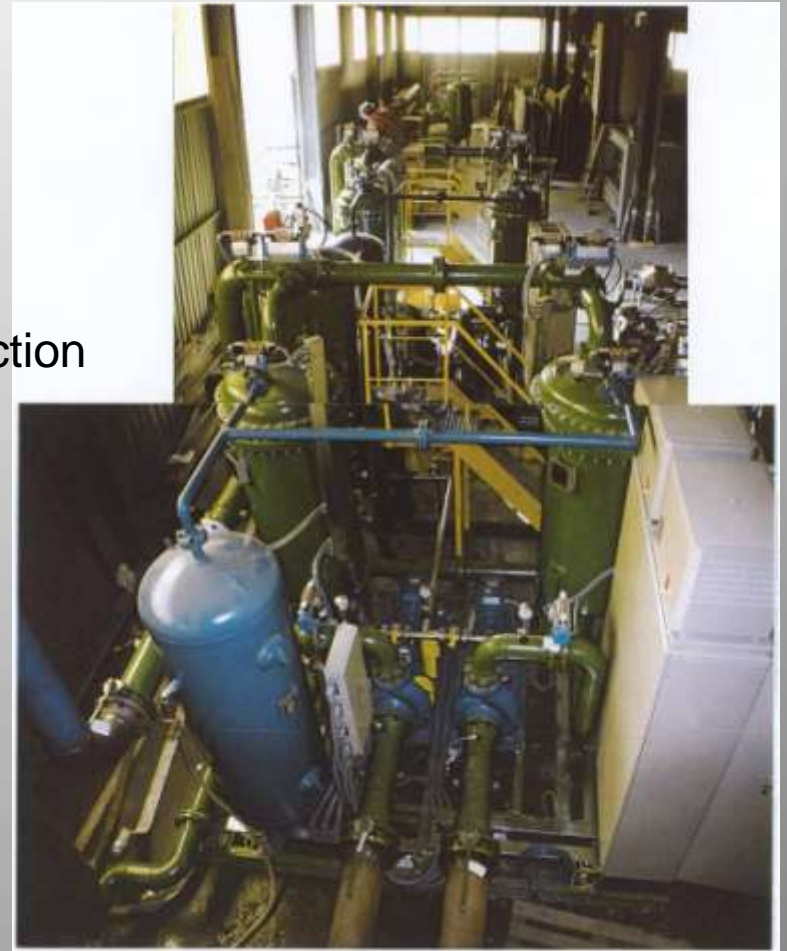

Deep Bed Protection

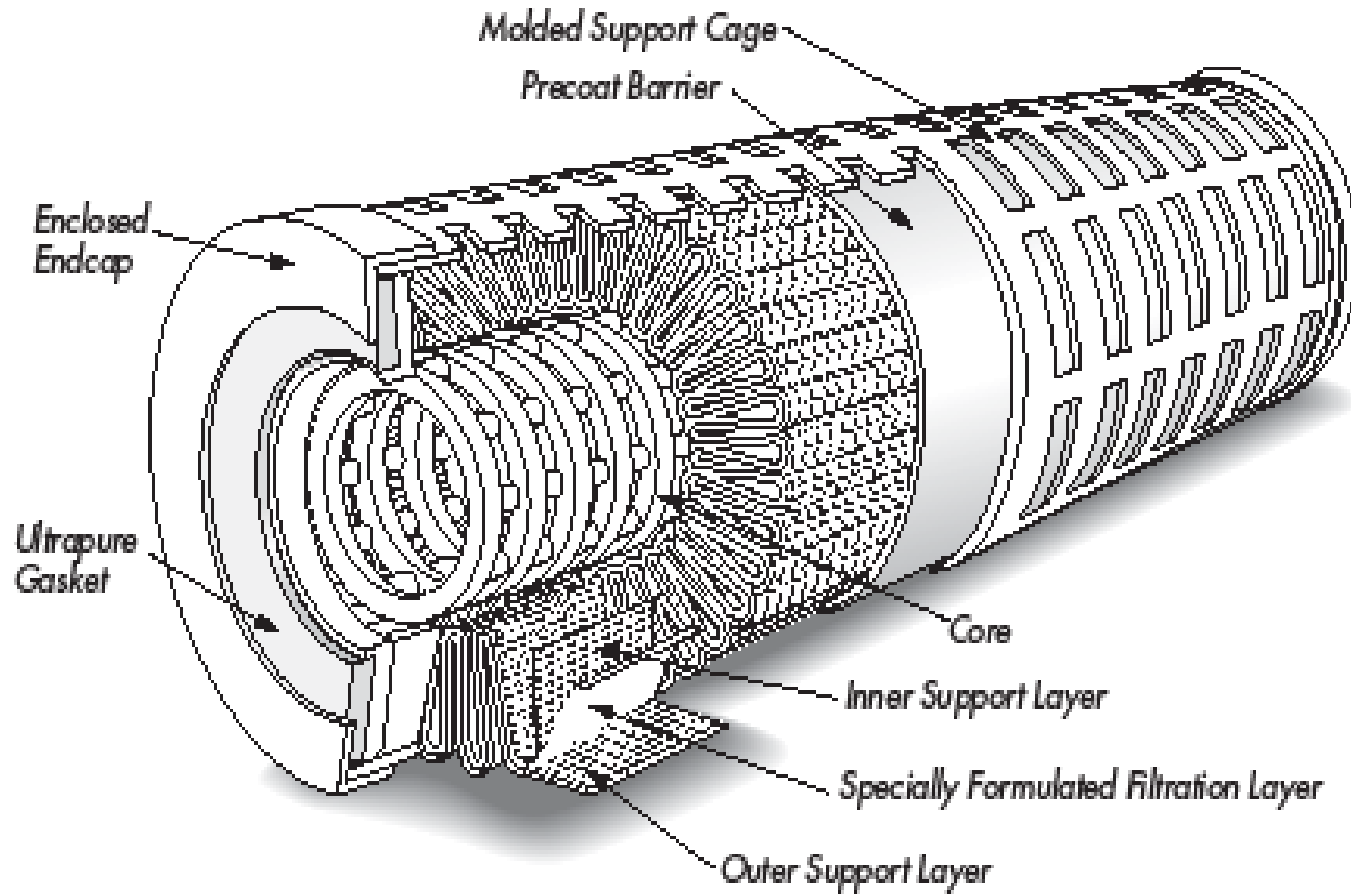

Powdex System HRSG

Two 36" x 72" Vessels
Each contain 52 2" x 50" precoat Septa
Provides both particulate and IEX protection
Skid mounted
PLC controlled

DualGuard III Condensate Septa

Protection from Chloride Attack

P 22 N Premix

Stress Corrosion Cracking ?
Iron deposits ?

The SOLUTION
